Sequence 33, Application US/09631092B
Patent No. 6730658
GENERAL INFORMATION:
APPLICANT: Alitalo et al.
TITLE OF INVENTION: RECEPTOR LIGAND VEGF-C
FILE REFERENCE: 28967/33348A
CURRENT APPLICATION NUMBER: US/09/631,092B
CURRENT FILING DATE: 2000-08-02
PRIOR APPLICATION NUMBER: 08/671,573
PRIOR APPLICATION NUMBER: 08/671,573
PRIOR FILING DATE: 1996-06-28
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     APPLICANT: ALITALO, KARI

Sequence 25721, Application US/09252991A

Retent No. 6551795
GENERAL INFORMATION:
APPLICANT: MATC J. Rubenfield et al.
TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO PSEUDOMONAS
TITLE OF INVENTION: AERUGINOSA FOR DIAGNOSTICS AND THERAPEUTICS
FILE REFERENCE: 107106, 136
CURRENT APPLICATION NUMBER: US/09/252,991A
CURRENT FILING DATE: 1999-02-18
PRIOR APPLICATION NUMBER: US 60/074,788
PRIOR APPLICATION NUMBER: US 60/074,788
PRIOR APPLICATION NUMBER: US 60/094,190
PRIOR FILING DATE: 1998-07-27
NUMBER OF SEQ ID NOS: 33142
SEQ ID NO 25721
LENGTH: 431
TYPE: PAT
ORGANISM: Pseudomonas aeruginosa

Proc. Natl. Acad. Sci. U.S.A. 97:9156-9161(2000).

-i- FUNCTION: Receptor for TNFSF13B/BLyS/BAFF and TNFSF13/APRIL.

Promotes B-cell survival and plays a role in the regulation humoral immunity. Activates NF-kappa-B and JNK.

-i- SUBUNIT: Associates with TRAF1, TRAF2, TRAF3, TRAF5 and TRAF

Natl. Acad. Sci. U.S.A. 99:16899-16903(2002).
-!- FUNCTION: Receptor for TNFSF13B/BLyS/BAFF and TNFSF13/APRIL.
--- Fromotes B-cell survival and plays a role in the regulation of humoral immunity. Activates NF-kappa-B and JNK (By similarity)
-!- SUBUNIT: Associates with TRAF1, TRAF2, TRAF3, TRAF5 and TRAF6
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Science
